PROFFESIONAL QUALIFICATION

- Successfully completed **Diploma in Web Design & Advanced Web Application Development** at LAVTC.
- Successfully completed **Diploma in Information Technology** at Esoft Metro Campus.
- Successfully completed **Diploma in English** at Esoft Metro Campus.
- Successfully completed **Certificate Course in English** at Colombo University.

ACADEMIC QUALIFICATION

- Following – **BSc (Hons) in Information Technology specialized Data Science** at SLIIT University.
- G.C.E (A/L) Examination year 2021
Science Stream – **3C's** | Prince of Wales' College
- G.C.E (O/L) Examination year 2018
6A's and 3B's | Prince of Wales' College

PROJECTS

- **Retail Analytics & Business Intelligence Project** | Python, Power BI, Data Warehouse, ETL
Developed a retail analytics solution to analyze sales performance and customer behavior using data warehousing and business intelligence techniques.
 - Designed and implemented the complete project independently.
 - Developed ETL processes, analytical reports, and interactive dashboards.
- **Smart Campus Management System** | React.js, Spring Boot, MongoDB
Developed a centralized platform for managing campus resources and bookings.
 - Developed the Resource Management module.
 - Designed and implemented multiple frontend UI components.
- **CamiLeaf Tea Factory Management System** | React.js, Spring Boot, MongoDB
Developed a web-based tea factory management system to support operational activities.
 - Developed the Product Management module.
 - Designed and implemented several user interface components.
- **Vehicle Rental Management System** | Java, SQL
Developed a vehicle rental platform for managing vehicle bookings and owner operations.
 - Developed the Vehicle Owner module.
 - Designed and implemented the user interface of the system.
- **Readelle Mobile Application** | Kotlin, Android Studio
Developed a mobile application for tracking moods, habits, and hydration levels.
 - Designed and developed the frontend user interface.
 - Created user-friendly screens for daily activity tracking.
- **Cake Shop Management System** | HTML, CSS, JavaScript, PHP, MySQL
Developed a complete web application for managing cake orders, products, and administrative operations.
 - Independently designed and developed the entire system.
 - Implemented customer-facing features and admin dashboard functionalities.
